
Profile Search Update

Posted by sfraise - 2009/11/15 11:36

I updated the profile search feature which is something that has been on my todo list for quite a while.

I've added the ability to search for only members with profile photos and added options to each search criteria to further narrow down the results by selecting (is equal to, is like, ect.)

I still need to work on the feature a bit more and eventually style the search page to shine it up a bit but it should give you better results now.

What do you mean?
Just click the drop down menu and choose your option and a text box should appear under it.

i dont kno what yalls talkn about but i still think we need to have daily announcements verbally played through the room..

dont ask me why i said this

could b the medication
