For other names of dumbasses like that, feel free to review my "fucktard" list. I've seen a lot of these names bitched about in chat...they bother a lot of people. Just a suggesstion...if they PM you while you're in chat....copy and paste it to the room. I've done that a lot...most of these douchebags leave me alone now. :-)

cudos to you i think all the girls should do a list of pervs....or better yet have a special link of the pervs names so the girls can put them on autoblock...autoignore.
